# GEFRAN

## KX

### INTRINSICALLY SAFE PRESSURE TRANSMITTER FOR APPLICATION IN HAZARDOUS AREAS

### Main Features

- Ranges from -1...+1 bar to 0...1000 bar
- Accuracy: ± 0.15% FS typical
- · ATEX certification for hazardous areas use
- Ambient/process temperature T4 (-40°...+80°C)
- · SIL2 approval according to IEC/EN 62061

KX pressure transmitters are based on Gefran proven thick film on stainless steel technology, with totally welded metal structure without internal seals, in order to be suitable with any kind of fluid.

Also the housing is stainless steel made, with IP65 to IP67 degree of environment protection.

This transmitter is suitable for all those applications which require robustness, safety as well as high accuracy.

The KX series can be used in applications characterized by the presence of explosive atmosphere.

For this reason the probes are designed and manufactured according to the ATEX 94/9/CE Directive.

### Main intrinsic safety characteristics

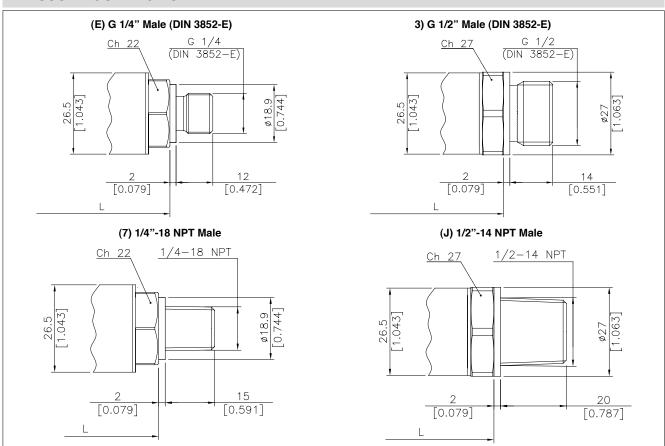

Transmitter designed and produced in compliance with Directive 94/9/CE ATEX and according to European standards for the Second group (II-surfaces), category 1, explosive atmosphere with presence of gases, fumes or mists (G) protection mode Ex ia T6, T5, T4 EC-Type Examination Certificate number: IMQ 13 ATEX 026 Type of protection: II 1G Ex ia IIC T6/T5/T4 Ga

### PRESSURE PEAKS PROTECTION

Many industrial applications, especially in hydraulics, could present dangerous phenomena like cavitation, liquid hammer or pressure peaks, due for example to pumps start and stop or fast closing of a valve.

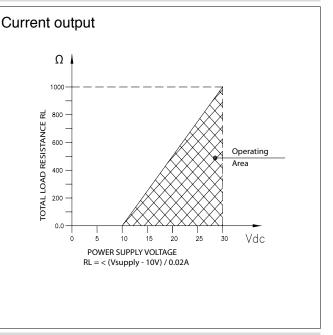

These phenomena can be harmful to the transducer.

The KX series, upon request, is available with an integrated pressure snubber which, thanks to a 0.5mm diameter through hole, eliminates these harmful peaks, to protect the transducer.

Contact Gefran to request the version with pressure snubber

### **LOAD DIAGRAM**

### SIL CERTIFICATION (Safety Integrity Level) - FUNCTIONAL SAFETY

Safety is a critical requirement especially for machine builders. The new European Directive 2006/42/EC defines all the essential requirements in this regard.

In the context of functional safety, the European directive is received by the technical standard **IEC / EN 62061** "Safety of machinery - Functional safety of safety-related electrical, electronic and programmable electronic control systems" (SRECS)

KX pressure transmitters are certified SIL CL 2 by the Certification Body TÜV Rheinland with Test Report

No. FS 28713306, in accordance with that rule, for use in applications "High Demand Mode" and then may be used in SRECS systems of machinery, where the safety variable to control will be the pressure of a fluid.

NOTE: 1) The SIL certification is supplied standard

2) Full specifications and installation and user manual of KX certified SIL 2 can be downloaded directly from the website www.gefran.com

### **ACCESSORIES ON REQUEST**

Connector Plugs			
Connection E		Connection P	
Connector EN 17301-803 Type A Prot. IP65	<b>CON 006</b>	7 pole female cable connector, Prot. IP40	CON 320
